

Structure of DR-NTU (Data)

The NTU open access research data repository DR-NTU (Data) is organised by sub-dataverses. School or research institute based sub-dataverses are created to facilitate the creation of sub-dataverses by individual researchers or projects. Each sub-dataverse is like a container for datasets that are collected/generated specifically by the individual or project.

The higher level dataverses can be further organized into the following sub dataverse categories:
