

# Sub-dataverses in DR-NTU (Data)

A sub-dataverse is a dataverse created and nested under the NTU root Dataverse. A sub-dataverse can be created for individual researchers, departments and projects. Each dataset contains descriptive metadata and data files which may include documentation such as readme files, codebooks etc, that facilitate data reuse. As an organising method, sub-dataverses may also contain other sub-dataverses.

## Example of a sub-dataverse in DR-NTU (Data)

**School sub-dataverse**

**Wee Kim Wee School of Communication and Information (WKWSCI)**  
(Nanyang Technological University)

**Introduction about the sub-dataverse which can be customised by the owner of the sub-dataverse**

DR-NTU (Data) > **Wee Kim Wee School of Communication and Information (WKWSCI)**

This dataverse is a collection of Wee Kim Wee School of Communication and Information's research data.

The Wee Kim Wee School of Communication and Information at Nanyang Technological University is widely regarded as one of the top schools in communication and information globally. With a team of talented faculty and research staff, the School undertakes a range of interdisciplinary research that straddles across the fields of communication and information. The School's main research strengths lie in two areas, namely, social media studies and information behaviour research.
